

Test Document - Fail All Modules (v3)

1. Introduction

This document shall describe the UAV system, also called drone.
Figure 99 shows the high-level architecture but is not defined.
Table 5 presents hardware configuration but is not defined.

1.2 *Motivation*

1.4 *Justification*

This breaks the heading sequence.

2. System Overview

This system uses RJ45 and LAN to enable Ethernet communication.

See [2] and [3] for performance validation.

Note: Figure 99 and Table 5 are referenced but not defined.
